Dedicated and results-driven Software Developer with a demonstrated track record of over 3 years specializing in front-end development. Committed to crafting seamless, pixel-perfect and responsive websites and embracing a mobile-first philosophy to enhance user experiences. Proficient in leveraging a versatile skill set to navigate through the latest development tools and methodologies, ensuring the delivery of innovative solutions. A collaborative team player adept at fostering productive environments to achieve collective goals.

WORK EXPERIENCE

The Outdoor Plus

Feb. 2023 – Present

Web Developer

Ontario, CA

- Management of the company's main and secondary e-commerce websites, driving regular enhancements, including product additions and modifications within a Wordpress and WooCommerce environment. Successfully executed comprehensive SEO strategies, optimizing website visibility and driving traffic growth.
- Leading development of advanced software solutions using Vue.js, TailwindCSS, and Supabase to empower dealers with streamlined client quoting, custom quotes, invoicing, and real-time product pricing. Enhancing internal efficiency and modernizing workflows.
- Pioneered data collection and analysis from dealers, streamlining information for sales partners through Python, Pandas, and Google Workspace scripting, boosting efficiency.

TRIBUS

Feb. 2022 - Oct. 2022

Software Developer

Remote

- Work mainly focused as a Front End Developer working on the company's software/CRM, which helps clients, brokers and agents custom websites to meet their specific needs. Main stack: Vue.js, Adonis.js and Nuxt.js
- Work alongside the development team to solve tickets, features and bugs to meet the clients and business needs.
- Review and approve pull requests for new features and bug fixes submitted by the other developers in the team.

Amazon ONT 8

Nov. 2021 - Feb. 2022

Data Analyst

Moreno Valley, CA

- Develop and support a set of tools for ONT8 Warehouse and the IXD Regional Network. Applying my programming skills and experience to find new solutions to the business needs and working alongside operations teams from all departments to provide data and analytical support. Collecting and mining data from different websites and sources to generate operation reports.
- Design queries and collect information from different sources, cleaning and analyzing the data during the process to share the results to Process Assistant, Area Managers and Operation Managers.
- Develop tools and scripts in python to fetch the data from different websites where the Warehouse data reports are located and compile that into a single tool
- Provide analytical thinking, solutions and tools/programming languages alternatives to manage the data in a more efficient way to improve our goal and tools performance.

Fitune (Contract)

Apr. 2021 - Aug. 2021

Frontend Engineer

Remote

- In charge of reviewing PR's, make code reviews, migration from Vue to Nuxt to support new functionalities and estimation of new features.

Elaniin

Front End Developer

Sep. 2019 - Apr. 2021

San Salvador, El Salvador

- Plan, develop, deploy and maintain web applications. Provided effective troubleshooting and remediation to client's websites.
- Effectively translated client requirements into application designs and system requirements. Followed policies and procedures related to application methods and quality standards at all times. Work well independently and within a team setting.

EDUCATION

Central American University "Jose Simeon Cañas" (UCA)

December, 2021

Bachelor of Science, Computer Science

San Salvador, El Salvador
